Project Details :

Project # 1:

* Project Title: Profisc HRM

*Project Overview: Profisc HRM is a comprehensive Human Resource Management System designed to efficiently manage all aspects of employee data. This system includes modules for tracking employee attendance, managing salaries, handling payroll processing, and maintaining detailed employee records. Through Profisc HRM, organizations can streamline their HR operations, ensuring accuracy and enhancing productivity.

* Framework Used : Laravel (10.10)

* Roles:

- Developing this using Laravel framework.
- Preparing documentations for this project.
- Prepare different modules and test them.
- Ensure quality in the deliverables.

Project # 2:

* Project Title: Playschool

Project Overview: Developed a comprehensive management system for playschools, incorporating key modules such as students, admission forms, payments, receipts, and branch management. The system enabled efficient handling of student records, streamlined the admission process, facilitated online fee payments, generated receipts, and managed multiple branches. This project enhanced operational efficiency and improved user experience for both staff and parents.

* Framework Used : PHP Codeigniter

* Roles:

- Developing an application using Laravel framework.
- Preparing documentations for this project.
- Prepare different modules and test them.
- Ensure quality in the deliverables.

Project # 3:

* Project Title: Recitepro

*Project Overview: Developed a robust content management system tailored for managing and distributing Arabic recitations, with key modules including category management, user management, content management, Surah management, reciter management, and transaction management. The admin panel allows for the addition of songs and reciters linked to Arabic alphabets, which are displayed on both the app and website. This system ensures seamless organization and access to recitations, enhancing user engagement and administrative efficiency.

* Framework Used : Laravel (10.8)

* Roles:

- Developing an application using Laravel framework.
- Preparing documentations for this project.
- Prepare different modules and test them.
- Ensure quality in the deliverables.

Project # 4:

* Project Title: Task Management System

*Project Overview: Designed and developed a web-based task management system using Laravel and MySQL and Yajra datatable for pagination. The system supports user authentication,

allowing users to register, log in, and manage tasks. Key features include task creation, editing, deletion, and status updates with attributes such as title, description, due date, and priority level. The system distinguishes between regular users, who manage their own tasks, and admins, who manage all tasks and users. It also includes an activity log to track user actions and employs role-based access control, form validation, and pagination for efficient task listing.

* Framework Used : Laravel (10.10)

* Roles:

- Developing an application using Laravel framework.
- Preparing documentations for this project.
- Prepare different modules and test them.
- Ensure quality in the deliverables.

Project # 5:

* Project Title: Medendx

*Project Overview: Developed the Medendx HRM System, where I created and managed APIs using Laravel. Implemented a role-based management system to control user access and ensure secure handling of employee data.

* Framework Used : Laravel (10)

* Roles:

- Prepare different modules APIs and test them on postman.
- Led this project alongside one of my juniors.

Project # 6: (Running Project)

* Project Title: Online Editor

*Project Overview: Developed an online editor project with a role-based management system, integrated phonepay payment gateway for subscription plans, and a user management system to handle account settings, access control, and subscriptions effectively with using some code editor AI.

* Framework Used : PHP - using template engine with smarty framework.

* Roles:

- Handle the entire project independently.

Personal Profile:

✔ **Strengths:** Good Analytical Skills, Creative, Good Team Player, Positive attitude, Eager to learn new things.

✔ **Hobbies**: Writing poems, Web surfing, Listening Music.
